

Courier Management System (CMS)

1. Introduction

Courier and logistics companies handle a large number of shipments every day. Many organizations still depend on manual registers or disconnected systems to manage parcel booking, tracking, and delivery updates. This leads to delays, data errors, and difficulty in monitoring shipment status.

To solve these issues, we developed a Courier Management System (CMS) using the Salesforce platform. This system helps in managing shipment booking, delivery agent assignment, parcel tracking, invoice generation, and reporting in a centralized digital platform.

The system improves operational efficiency, reduces manual work, and provides real-time updates to the management team.

2. Purpose of the Project

The main purpose of the Courier Management System is to automate courier service operations. The system helps organizations manage shipments efficiently and track parcel status in real time.

Key objectives:

- Centralized shipment management
- Automatic delivery status updates
- Delivery agent assignment
- Invoice generation
- Reports and dashboards for performance monitoring

3. Ideation Phase

Courier companies face several challenges when shipment management is handled manually.

Common problems include:

- Manual shipment tracking
- Lack of real-time delivery updates
- Difficulty in assigning delivery agents
- Poor visibility of shipment status
- Delay in customer notifications

These problems result in operational delays, reduced efficiency, and customer dissatisfaction.

4. Requirement Analysis

Customer Journey:

Booking → Shipment Creation → Agent Assignment → Transit
→ Delivery Update → Invoice Generation → Reporting

Functional Requirements:

1. Customer Management
2. Shipment Booking
3. Delivery Agent Assignment
4. Real-time Shipment Status Updates
5. Invoice Generation
6. Reports and Dashboards

Non - Functional Requirements

Usability – Easy user interface

Security – Role based access control

Reliability – Accurate data processing

Performance – Fast tracking updates

Availability – 24/7 cloud access

Scalability – Supports multiple branches

5. Technology Stack

User Interface – Salesforce Lightning

Logic – Salesforce Flows

Database – Salesforce Objects

Automation – Validation Rules and Flows

Security – Roles and Profiles

Reporting – Reports and Dashboards

6. Project Design

The Courier Management System provides a centralized platform to manage courier operations. It automates shipment tracking, delivery updates, billing, and reporting.

This system reduces manual work and improves delivery efficiency.

7. System Components

The system contains the following main objects:

- Customer
- Shipment
- Delivery Agent
- Branch

- Delivery Update
- Invoice

These objects are connected through relationships to store and manage courier data efficiently.

8. Project Development

Salesforce developer account was created to implement the project. The system was built using Salesforce tools such as custom objects, validation rules, flows, reports, and dashboards.

Milestone 1: Salesforce Account

Creating Developer Account

The screenshot shows the 'Sign up for your Developer Edition' form. The form is titled 'Sign up for your Developer Edition' and describes it as 'A free Salesforce Platform environment with Agentforce and Data Cloud'. It contains several input fields: 'First name' (M JAINUL NISMA), 'Last name' (Team), 'Job title' (DEVELOPER), 'Company' (Deen College of Arts and Sci...), 'Country/region' (India), and 'Work email' (deencs23nisma@gmail.com). Each field has a green checkmark indicating it is valid. At the bottom, there is a checkbox for 'I agree to the Main Services Agreement – Developer Services and Salesforce Program Agreement' which is checked. A small note at the bottom states: 'Your free trial may be provisioned on or migrated to Hyperforce, Salesforce's public cloud infrastructure.'

Milestone 2: Object

Salesforce objects are database tables that permit you to store data that is specific to an organization. It consists of fields (columns) and records (rows).

Custom Objects Created:

Customer – Stores customer details

Shipment – Stores shipment information

Delivery Agent – Stores delivery staff information

Branch – Stores courier branch details

Delivery Update – Stores shipment status updates

Invoice – Stores billing information

The screenshot shows the Salesforce Object Manager interface. At the top, there's a navigation bar with 'Setup', 'Home', and 'Object Manager'. Below this, a header section displays 'Object Manager' with a sub-header '52+ Items, Sorted by Last Modified'. A search bar and buttons for 'Schema Builder' and 'Create' are also present. The main content is a table listing custom objects.

LABEL	API NAME	TYPE	DESCRIPTION	LAST MODIFIED	DEPLOYED
Invoice	Invoice__c	Custom Object		3/4/2026	✓
Delivery Update	Delivery_Update__c	Custom Object		3/4/2026	✓
Branch	Branch__c	Custom Object		3/4/2026	✓
Delivery Agent	Delivery_Agent__c	Custom Object		3/4/2026	✓
Shipment	Shipment__c	Custom Object		3/4/2026	✓
Customer	Customer__c	Custom Object		3/4/2026	✓

Object Relationships:

Customer → Shipment

Shipment → Delivery Agent

Delivery Agent → Branch

Delivery Update → Shipment

Invoice → Shipment

Milestone 3: Tabs

Tabs in Salesforce help users view the information at a glance. It displays the data of objects and other web content in the application.

1. Creating a Tab for Customer Object
2. Creating a Tab for Shipment Object
3. Creating a Tab for Delivery Agent Object
4. Creating a Tab for Branch Object
5. Creating a Tab for Delivery Update Object
6. Creating a Tab for Invoice Object

Milestone 4: Fields & Relationships

Fields in Salesforce represent what the columns represent in relational databases. It can store data values which are required for a particular object in a record.

1. Creation of fields for the Customer Object

Field Name	API Name	Data Type	Required	Description
Customer Name	Name	Text	Yes	Full name of customer
Email	Email__c	Email	Yes	Customer email
Phone	Phone__c	Phone	Yes	Customer contact number
Address	Address__c	Text Area	Yes	Customer address
Customer Type	Customer_Type__c	Picklist	Yes	Regular / Business
City	City__c	Text	No	Customer city
State	State__c	Text	No	Customer state
Pincode	Pincode__c	Text	No	Postal code
Is Active	Is_Active__c	Checkbox	No	Active status

Branch Name	Name	Text	Yes
Branch Code	Branch_Code__c	Text	Yes
City	City__c	Text	Yes
State	State__c	Text	Yes
Manager Name	Manager_Name__c	Text	No

5. Creation of fields for Delivery_Update Object

Field Name	API Name	Data Type	Required
Update Number	Name	Auto Number	Yes
Shipment	Shipment__c	Master-Detail	Yes
Status	Status__c	Picklist	Yes
Update Date	Update_Date__c	Date/Time	Yes
Remarks	Remarks__c	Text	No

The screenshot shows the Salesforce Setup interface for the 'Delivery_Update' object. The 'Fields & Relationships' section is active, displaying a list of 7 fields sorted by Field Label. The fields are: Created By, Last Modified By, Remarks, Shipment, Status, Update Date, and Update Number. Each field entry includes its Field Label, Field Name (API Name), Data Type, Controlling Field, and Indexed status. The 'Shipment' field is a Master-Detail relationship with 'Shipment__c' as the API Name. The 'Update Number' field is an Auto Number with 'Name' as the API Name.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Created By	CreatedById	Lookup(User)		
Last Modified By	LastModifiedById	Lookup(User)		
Remarks	Remarks__c	Text(100)		
Shipment	Shipment__c	Master-Detail(Shipment)		✓
Status	Status__c	Picklist		
Update Date	Update_Date__c	Date/Time		
Update Number	Name	Auto Number		✓

6. Creation of fields for Invoice Object

Field Name	API Name	Data Type	Required
Invoice Number	Name	Auto Number	Yes
Shipment	Shipment__c	Lookup	Yes
Amount	Amount__c	Currency	Yes
Invoice Date	Invoice_Date__c	Date	Yes
Payment Status	Payment_Status__c	Picklist	Yes

The screenshot shows the Salesforce Setup interface for the 'Invoice' object. The 'Fields & Relationships' section is active, displaying a table of fields. The table has columns for Field Label, Field Name, Data Type, Controlling Field, and Indexed. The fields listed are: Amount, Created By, Invoice Date, Invoice Number, Last Modified By, Owner, Payment Status, and Shipment.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Amount	Amount__c	Currency(18, 0)		
Created By	CreatedById	Lookup(User)		
Invoice Date	Invoice_Date__c	Date		
Invoice Number	Name	Auto Number		✓
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User,Group)		✓
Payment Status	Payment_Status__c	Picklist		
Shipment	Shipment__c	Lookup(Shipment)		✓

Milestone 5: Validation Rules

Validation rules are applied when a user tries to save a record and are used to check if the data meets specified criteria. If the criteria are not met, the validation rule triggers an error message and prevents the user from saving the record until the issues are resolved.

Activity 1: Create Validation Rules on Customer__c

Validation Rule:

1. Email Must Not Be Blank
2. Phone Must Be 10 Digits
3. Pincode Must Be 6 Digits

The screenshot shows the Salesforce Setup interface for a Customer object. The left sidebar contains a navigation menu with options like Search Layouts, List View Button Layout, Restriction Rules, Scoping Rules, Object Access, Triggers, Flow Triggers, Validation Rules (selected), and Conditional Field Formatting. The main content area displays the 'Validation Rules' section for the Customer object, showing 3 items sorted by Rule Name. The table lists three active validation rules: Email_Required, Validate_Phone_Number, and Validate_Pincode.

RULE NAME	ERROR LOCATION	ERROR MESSAGE	ACTIVE	MODIFIED BY
Email_Required	Email	Email is required.	✓	M JAINUL NISMA Team, 3/4/2026, 4:32 PM
Validate_Phone_Number	Phone	Phone number must be 10 digits.	✓	M JAINUL NISMA Team, 3/4/2026, 4:35 PM
Validate_Pincode	Pincode	Pincode must be 6 digits.	✓	M JAINUL NISMA Team, 3/4/2026, 4:36 PM

Activity 2: Create Validation Rules on Shipment__c

Validation Rule:

1. Weight Must Be Greater Than Zero
2. Price Must Be Greater Than Zero
3. Expected Date Cannot Be in the Past

The screenshot shows the Salesforce Setup interface for a Shipment object. The left sidebar contains a navigation menu with options like Search Layouts, List View Button Layout, Restriction Rules, Scoping Rules, Object Access, Triggers, Flow Triggers, Validation Rules (selected), and Conditional Field Formatting. The main content area displays the 'Validation Rules' section for the Shipment object, showing 3 items sorted by Rule Name. The table lists three active validation rules: Validate_Expected_Date, Validate_Price, and Validate_Weight.

RULE NAME	ERROR LOCATION	ERROR MESSAGE	ACTIVE	MODIFIED BY
Validate_Expected_Date	Expected Date	Expected delivery date cannot be in the past.	✓	M JAINUL NISMA Team, 3/4/2026, 4:39 PM
Validate_Price	Price	Price must be greater than zero.	✓	M JAINUL NISMA Team, 3/4/2026, 4:38 PM
Validate_Weight	Weight	Weight must be greater than zero.	✓	M JAINUL NISMA Team, 3/4/2026, 4:37 PM

Activity 3: Create Validation Rules on Delivery_Agent__c

Validation Rule:

Email Must Be Valid

The screenshot shows the Salesforce Setup interface for the 'Delivery Agent' object. The left sidebar lists various setup options, with 'Validation Rules' selected. The main content area displays a table of validation rules for 'Delivery Agent'. There is one rule named 'Validate_Agent_Email' which is active and has an error message 'Enter a valid email address.'.

RULE NAME	ERROR LOCATION	ERROR MESSAGE	ACTIVE	MODIFIED BY
Validate_Agent_Email	Email	Enter a valid email address.	✓	M JAINUL NISMA Team, 3/4/2026, 4:42 PM

Activity 4: Create Validation Rules on Branch__c

Validation Rule:

Branch Code Must Not Be Blank

The screenshot shows the Salesforce Setup interface for the 'Branch' object. The left sidebar lists various setup options, with 'Validation Rules' selected. The main content area displays a table of validation rules for 'Branch'. There is one rule named 'Branch_Code_Required' which is active and has an error message 'Branch Code is mandatory.'.

RULE NAME	ERROR LOCATION	ERROR MESSAGE	ACTIVE	MODIFIED BY
Branch_Code_Required	Branch Code	Branch Code is mandatory.	✓	M JAINUL NISMA Team, 3/4/2026, 4:43 PM

Activity 5: Create Validation Rules on Delivery_Update__c

Validation Rule:

Remarks Required If Status is Delayed

The screenshot shows the Salesforce Setup page for the 'Delivery Update' object. The left sidebar lists various setup options, with 'Validation Rules' selected. The main content area displays a table of validation rules for 'Delivery_Update__c'. There is one rule named 'Remarks_Required_For_Delay' which is active and was modified by 'M JAINUL NISMA Team' on 3/4/2026 at 4:44 PM. The rule's error location is 'Remarks' and the error message is 'Remarks are required when status is Delayed.'.

RULE NAME	ERROR LOCATION	ERROR MESSAGE	ACTIVE	MODIFIED BY
Remarks_Required_For_Delay	Remarks	Remarks are required when status is Delayed.	✓	M JAINUL NISMA Team, 3/4/2026, 4:44 PM

Milestone 6: Page Layouts

Page Layouts in Salesforce control what a user sees on a record page and how information is organized. They help structure fields, sections, buttons, related lists, and other components in a clean and user-friendly way. By customizing page layouts, we ensure that users can easily enter, update, and view the required data.

Activity 1: Edit Page Layout for Customer__c

Activity 6: Edit Page Layout for Invoice__c

The screenshot shows the Salesforce Setup interface for the 'Invoice' object. The left sidebar contains a navigation menu with options: Details, Fields & Relationships, Page Layouts (selected), Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, and Record Types. The main content area is titled 'Invoice' and shows 'Page Layouts' with 1 item. A table lists the page layout 'Invoice Layout', created by 'M JAINUL NISMA Team' on 3/4/2026 at 8:23 AM, and modified by the same team on 3/4/2026 at 7:26 PM. The interface includes a 'Quick Find' search bar, 'New' and 'Page Layout Assignment' buttons, and a 'Developer Edition' badge.

PAGE LAYOUT NAME	CREATED BY	MODIFIED BY
Invoice Layout	M JAINUL NISMA Team, 3/4/2026, 8:23 AM	M JAINUL NISMA Team, 3/4/2026, 7:26 PM

Milestone 7: Flows

Salesforce flows are used to automate business processes.

Example:

When a Delivery Update record is created, the system automatically updates the related Shipment status. This reduces manual work and ensures accurate tracking.

Milestone 8: The Lightning App

Apps in Salesforce are a group of tabs that help the application function by working together as a unit. It has a name, a logo, and a particular set of tabs. The simplest app usually has just two tabs.

Activity 1: Create a Lightning App

Milestone 9: Profile

A profile is a group/collection of settings and permissions that define what a user can do in salesforce. A profile controls “Object permissions, Field permissions, User permissions, Tab settings, App settings, Apex class access, Visualforce page access, Page layouts, Record Types, Login hours & Login IP ranges. A profile can be assigned to many users, but users can be assigned a single profile at a time.

Activity 1: Create a Custom Profile – Courier Admin

Activity 2: Create a Custom Profile – Branch Manager

Ensure Visible Tabs Include:

Set these tabs as Default On or Visible:

- Customers
- Shipments
- Delivery Agents
- Branches
- Delivery Updates
- Invoices
- Reports
- Dashboards

Activity 3: Create a Custom Profile – Delivery Agent

App & Tab Access

Default App: Courier Management System

Visible Tabs:

- Shipments
- Delivery Updates

Activity 4: Create a Custom Profile – Customer Support

Access Configuration

Tabs Visible:

- Customers
- Shipments
- Delivery Updates

Milestone 10: Role

In Salesforce, roles are used to determine which users have access to certain data and functions within the system. They are also used to define the reporting hierarchy within an organization. Users with higher roles have greater access to data and more control over the system.

Creation of Role:

1. Creation of Courier Admin Role
2. Creating Branch Manager Role Under Courier Admin Role
3. Creating Delivery Agent Role Under Branch Manager Role

4. Creating Customer Support Role Under Branch Manager

Milestone 11: User

A user is anyone who logs in to Salesforce. Users are employees at your company, such as sales, reps, managers, and IT specialists, who need access to the company's records. Every user in Salesforce has a user account. The user account identifies the user, and the user account settings determine what features and records the user can access.

To Create a User

- Courier Admin
- Branch Manager
- Delivery Agent
- Customer Support

The screenshot shows the Salesforce Setup interface for managing users. The left sidebar contains navigation options like Analytics Groups, Permission Set Groups, Profiles, and User Management Settings. The main content area displays a table of users with columns for Action, Full Name, Alias, Username, Role, Active status, and Profile. Buttons for 'New User', 'Reset Password(s)', and 'Add Multiple Users' are visible above and below the table.

Milestone 12 : Reports & Dashboards

Reports and Dashboards help analyze business data and track courier operations efficiently.

Activity 1: Create Report Types

The screenshot shows the Salesforce Reports interface. The left sidebar lists navigation options like Customers, Shipments, Delivery Agents, Branches, Delivery Updates, Invoices, Reports, and Dashboards. The main content area displays a table of recent reports with columns for Report Name, Description, Folder, Created By, Created On, and Subscribed. Buttons for 'New Report' and 'New Folder' are visible.

Report 3: Revenue Report

The screenshot shows a Salesforce Developer Edition interface. The browser address bar displays the URL: `orgfarm-e615a43dbd-dev-ed.develop.lightning.force.com/lightning/r/Report/000fj000008eMBhEAM/view?queryScope=userFolders`. The Salesforce header includes a search bar and navigation tabs: Customers, Shipments, Delivery Agents, Branches, Delivery Updates, Invoices, Reports (active), and Dashboards. The main content area displays a report titled 'Report: Shipment Tracking Report' and 'Revenue by Branch Report'. It shows 5 total records in a table with columns: Status, Tracking Number, Customer: Customer Name, Expected Date, Assigned Agent: Agent Name, and Price. The table includes rows for 'Booked', 'In Transit', 'Out for Delivery', 'Delivered', and 'Cancelled' statuses, each with a subtotal. At the bottom, there are toggle switches for 'Row Counts', 'Detail Rows', 'Subtotals', and 'Grand Total', all of which are currently enabled.

Activity 3: Create Dashboard

Step 1: Open Dashboards

1. Click App Launcher (9 dots)
2. Search Dashboards
3. Click New Dashboard

Step 2: Enter Dashboard Details

- Name: **Courier Management Dashboard**
- Folder: CMS Reports
- Click Create

Activity 4: Add Dashboard Components

Component 1: Shipment Status Overview (Donut Chart)

Component 2: Agent Performance (Bar Chart)

Component 3: Revenue by Branch (Column Chart)

Final Layout :

9. Project Outcome

The Courier Management System successfully automates courier operations.

Benefits include:

- Centralized shipment tracking
- Reduced manual work
- Faster delivery updates
- Improved customer satisfaction
- Better business insights

10. Conclusion

The Courier Management System provides a digital solution for managing courier operations efficiently. Using the Salesforce platform, shipment booking, delivery tracking, billing, and reporting processes are automated, improving productivity and service quality.

11. Future Scope

Future improvements can include:

- Mobile courier tracking application
- GPS integration for delivery tracking
- SMS notifications for customers
- AI-based delivery optimization
